

## Senior researcher/Senior adviser – Wood and wood technology

Due to increased interest in competence in wood and its use in products and structures, the Norwegian Institute of Wood Technology (Treteknisk) is looking for experienced researchers and advisors.

We offer our employees varied tasks and excellent opportunities to develop their competence. At Treteknisk you will enjoy flexible work hours and get the opportunity to work partly from home.

### Typical activities include:

- Lead and contribute to research and development projects in Norway and the EU
- Lead product development projects in the wood industry
- Share knowledge and competence at conferences
- Laboratory work, testing and analysis
- Competence development in the industry (courses and seminars)
- Project development and proposal writing

### Required qualifications:

- Relevant higher education at university level, preferably PhD
- Experience from research and development projects related to wood and wood technology
- Broad knowledge about wood and wood modifications
- Experience from proposal writing (EU grants etc)

### We are looking for someone who:

- Is structured, analytical and goal oriented
- Can work independently as well as in teams
- Communicates well, both orally and written
- Has the ability to build strong professional relations and networks
- Thrives in the interface between academia and industry

### About Treteknisk:

Treteknisk is the R&D center for the sawmill and timber industry in Norway. Our main tasks are research and development projects, quality control, quality documentation, laboratory tests and dissemination of knowledge from R&D to the Norwegian wood industry.

Currently, the institute has 32 employees. Our location is at Gaustad/Vinderen in Oslo.
